# UNEMPLOYMENT—UNITED STATES SUMMARY

---

**Introduction.**—The Census of Unemployment was taken in April, 1930, as a part of the enumeration of the population for the Fifteenth Census. The results of this census were first published in a series of State bulletins, in which the returns were presented for the State as a whole, and for cities and counties. This bulletin summarizes the unemployment returns for the entire area of continental United States, showing also tables for geographic divisions and States, and for cities of 50,000 and over. Returns from the special enumeration of the unemployed made in 19 cities in January, 1931, are not included.

The material presented in this bulletin has been prepared under the supervision of Dr. Leon E. Truesdell, chief statistician for population, and Dr. George B. L. Arner, who is in charge of the Unemployment Census.

**Method of enumeration.**—The enumerators for the Fifteenth Census were instructed to ask each person reporting a gainful occupation whether or not he (or she) was at work on the preceding day. If not, the enumerator was instructed to obtain further information and to make entries on a separate unemployment schedule. On this schedule distinction was made between persons having jobs and persons having no jobs of any kind.

For persons having jobs, the questions were:

1. How many weeks since he has worked on that job?
2. Why was he not at work yesterday?
3. Does he lose a day's pay by not being at work?
4. How many days did he work last week?
5. How many days in a full-time week?

For persons having no jobs of any kind, the questions were:

1. Is he able to work?
2. Is he looking for a job?
3. For how many weeks has he been without a job?
4. Reason for being out of a job (or for losing his last job).

Reference was made on the unemployment schedule to the sheet and line of the population schedule containing entries for the same person, and from this schedule information was transcribed to the unemployment schedule as to sex, color and nativity, age, marital condition, relationship to the head of the family, and occupation.

**Prior Censuses of Unemployment.**—An inquiry concerning unemployment was included in the schedules of the Tenth, Eleventh, Twelfth, and Thirteenth Censuses (1880, 1890, 1900, and 1910), and some returns from this inquiry were published in 1890 and 1900. In these earlier enumerations persons 10 years old and over reporting a gainful occupation were asked to state the number of months they had been unemployed during the census year. The question was omitted entirely from the schedule of the Fourteenth Census (1920). The question on the schedule for the Fifteenth Census (1930) refers to actual unemployment on the day preceding the enumerator's call. None of the figures from the enumerations of 1890 and 1900 are given in this bulletin, as it is obvious from the nature of the questions that these earlier figures are not in any way comparable with the returns from the inquiry made in 1930.

**Unemployment classes.**—Since the enumerators were asked to make entries on the unemployment schedule for all persons who were not at work "yesterday," it is obvious that many persons would be returned on these schedules who were not "unemployed," in accordance with the general acceptance of the term. It was, therefore, considered advisable to separate these returns into seven classes in accordance with the answers to the questions asked by the enumerators. The primary separation adopted was based on the answer to the question, "Does this person have a job of any kind?" Those who replied "Yes" were next separated into those idle without pay and those idle with pay. Finally, from those with jobs and idle without pay were separated those who gave sickness or disability as the reason for idleness, and those who reported themselves as voluntarily idle. Those who had no jobs of any kind were first separated in accordance with the answer of "Yes" or "No" to the question, "Is he able to work?" and those who replied "Yes" to this question were further separated on the basis of the next question, "Is he looking for a job?"

Table 1 presents returns in seven classes thus obtained for the United States by sex, together with the total population, the population 10 years old and over, and the total number of gainful workers—that is, persons reporting a gainful occupation. Each of the seven classes shown in this table has a definite relation to the unemployment problem, though some of them are composed mainly of persons who would not, even under the most elastic definition, be considered as "unemployed." Since the classes are widely different in their make-up and in their social significance, no total is given, either in this table or elsewhere.

TABLE 1.—UNEMPLOYMENT RETURNS BY CLASSES, BY SEX, FOR THE UNITED STATES: 1930

DESCRIPTION OF CLASS	Total	Male	Female
Total population.....	122, 775, 046	62, 137, 080	60, 637, 966
Population 10 years old and over.....	98, 723, 047	49, 949, 798	48, 773, 249
Gainful workers (persons reporting a gainful occupation).....	48, 832, 589	38, 053, 795	10, 778, 794
UNEMPLOYMENT RETURNS BY CLASSES			
CLASS A.—Persons out of a job, able to work, and looking for a job.....	2, 429, 062	2, 058, 738	370, 324
Per cent of total population.....	2.0	3.3	0.6
Per cent of gainful workers.....	5.0	5.4	3.4
CLASS B.—Persons having jobs but on lay-off without pay, excluding those sick or voluntarily idle.....	758, 585	627, 407	131, 178
Per cent of total population.....	0.6	1.0	0.2
Per cent of gainful workers.....	1.6	1.6	1.2
CLASS C.—Persons out of a job and unable to work.....	172, 661	140, 864	31, 797
CLASS D.—Persons having jobs but idle on account of sickness or disability.....	273, 588	208, 278	65, 310
CLASS E.—Persons out of a job and not looking for work.....	87, 988	61, 068	26, 920
CLASS F.—Persons having jobs but voluntarily idle, without pay....	84, 595	60, 254	24, 341
CLASS G.—Persons having jobs and drawing pay, though not at work (on vacation, etc.).....	82, 335	63, 544	18, 791

Class A, which constitutes by far the greater part of the unemployment returns, is made up of those persons who are unemployed in the strictest sense of the term, being out of a job, able and willing to work, and looking for a job.

Class B includes many persons who are working on part time, and are therefore better situated than those who have no jobs at all. The question as to whether a man has a job or not has proved to be a difficult one to answer, and class B includes many persons who have been laid off from their jobs for long periods (the tabulation by weeks idle will show how long), some of whom are practically in the same position as those in class A. Nominally, they have a job, but practically they are not receiving any income from that job, and they may have no definite promise as to when that income will be resumed.

Classes C and D are made up of persons unable to work. Their separation from their job is a matter of personal misfortune rather than the result of a scarcity of employment.

Classes E, F, and G are made up for the most part of persons whose idleness is voluntary, and who were included in the unemployment count as an incidental result of the method of selection used. Class E is composed of persons able to work and having no job, who were reported by the enumerator as not looking for work. Class F is made up of persons having jobs and not drawing pay, for whom the reason for idleness was reported to be "voluntary lay-off" or its equivalent. Class G includes all those having jobs who were reported by the enumerator as not losing pay as a result of their idleness, being mainly persons on vacation with pay.

According to the returns on which the classifications were based, the persons in these three classes have little in common with the truly unemployed. It is possible, however, that in an appreciable number of these cases one or more questions were misunderstood and incorrectly answered. For example, many persons in class E gave reasons for idleness (such as "plant closed" or "off season") which suggest that the reason for their not seeking work was that they felt it useless to look for work in their occupation at that time. Some of these might properly have been placed in class A, if more adequate information had been available. Class F may include some persons for whom the reason "voluntary lay-off" was given by enumerators who misunderstood the expression. Class G includes a considerable number of persons reporting long periods of idleness, which seem inconsistent with continued wage payments and certainly with the assumption that they were on vacation, suggesting a possible misunderstanding on the part of the enumerator. From these two groups some persons might therefore have been transferred to class B on the basis of a correct interpretation of the questions and of the information given to the enumerator.

**Color and nativity.**—For all areas, classes A and B are shown by sex, and by color or race. Nativity classes (native white, native parentage; native white, foreign or mixed parentage; and foreign-born white) are shown for the white race only. For the Southern States (Delaware, Maryland, the District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, and Texas), separate tabulations are shown for Negroes.

Table 2 presents classes A and B by sex, color, and nativity, for the United States, in comparison with the total population similarly classified.

TABLE 2.—UNEMPLOYMENT RETURNS—CLASSES A AND B, BY SEX, COLOR, AND NATIVITY, FOR THE UNITED STATES: 1930

CLASS D.—Persons having jobs but idle on account of sickness or disability.....	3,370	2,826	544
CLASS E.—Persons out of a job and not looking for work.....	1,931	1,560	371
CLASS F.—Persons having jobs but voluntarily idle, without pay...	1,732	1,496	236
CLASS G.—Persons having jobs and drawing pay, though not at work (on vacation, etc.).....	931	838	93

**Period of idleness.**—Table 4 presents the unemployment returns in classes A and B, by sex and by number of weeks idle. For class A (persons out of a job, able to work, and looking for a job) these periods are based on the replies to the question, "For how many weeks has he been without a job?" For class B (persons having jobs, but on lay-off without pay), the question reads, "How many weeks since he has worked on that job?" If these questions were followed literally, the periods of idleness for class A should represent the number of weeks with no employment whatever, while the second form of the question admits of the possibility of some employment in the form of odd jobs and makeshift occupations. As would be expected, long periods of idleness form a larger percentage of the total in class A than in class B. In class B, however, the number of persons with periods of idleness in excess of two weeks is 42 per cent, and the number of those reporting periods of idleness in excess of nine weeks, 21 per cent. In Table 16 periods of idleness for classes A and B are presented by sex for geographic divisions, and in Tables 43 and 45, classes C, D, F, and G are shown for the United States by periods of idleness and sex.

TABLE 4.—UNEMPLOYMENT RETURNS—CLASSES A AND B, BY SEX AND BY PERIOD OF IDLENESS, FOR THE UNITED STATES: 1930

PERIOD OF IDLENESS	CLASS A <i>Persons out of a job, able to work, and looking for a job</i>			CLASS B <i>Persons having jobs but on lay-off without pay, excluding those sick or voluntarily idle</i>

**Reason for idleness.**—The reasons for idleness, shown in the same form and for the same areas as periods of idleness, represent the consolidation into groups of a great variety of reasons given on the unemployment schedules. These reason groups may be outlined briefly as follows:

*Voluntary absence:*

“Voluntary lay-off.”

Other reasons indicating voluntary idleness.

*Personal disability.*

*Family reasons.*

*Weather conditions.*

*Breakdown of plant or equipment.*

*Seasonality (off season):*

“Off season.”

Other reasons implying seasonality.

*Economic conditions:*

Lack of orders or “business dull.”

Job completed or not begun.

Shortage of materials, equipment, or cars.

Plant (factory, mine, store, etc.) closed, moved, or sold.

Plant or worker on part time.

Substitute workers or “extra gangs.”

Other economic conditions.

*Industrial policy:*

Machines introduced or replaced.

Reduction of force.

Cheaper labor substituted.

Worker too old (actually given as reason).

Other reasons involving industrial policy.

*Labor disputes.*

*Immediate or superficial reasons:*

Laid off.

Other immediate reasons (“No work,” “Can’t find work,” “Slack work,” etc.).

*Dissatisfaction (with job or conditions of work).*

*Miscellaneous.*

*Reason not reported.*

These reasons are in most cases self-explanatory, and all groups are represented in the tables for class A. In class B, however, there are no cases of personal disability or voluntary absence from work, since by definition these cases have been excluded from class B. Here again, as in connection with the period of idleness, the classification is based on questions differing somewhat as between persons reporting that they had no job (class A), and persons reporting that they did have a job, but were not at work (class B). The question on which the reason classification for class A is based reads as follows: “Reason for being out of a job (or for losing his last job).” Jobless persons, therefore, had the option of reporting the reason for not having a job at the time the question was asked or the reason for losing the last job they had. The apparent inconsistency of a return showing a man reported as able to work and looking for work, with illness or disability as the reason for idleness, may be explained, therefore, on the assumption that the man reported illness as the reason for losing his last job, but has since recovered and is now able to work. For class B the reasons shown in the tables are based on the question “Why was he not at work yesterday?” Even for persons in class B, however, there were evidently certain alternatives presented in

connection with the replies to this question. Large numbers of the entries on the schedules carry reasons of the type classified in the general group entitled "Immediate or superficial reasons," such as "No work," or "Can not find work." Answers in this group represent either a failure on the part of the enumerator to obtain a more definite and significant reason, or a real lack of knowledge on the part of the person enumerated as to why work was difficult to obtain.

Table 5 shows the unemployment returns for classes A and B, by sex and by main reason groups. It will be noted that by far the greater part of the reasons given for both classes fall within three main reason groups: Economic conditions, immediate or superficial reasons, and seasonality. Family reasons, weather conditions, and breakdown of plant or equipment are important in class B, but not in class A, while dissatisfaction and reasons of industrial policy are significant for class A, but not for class B. In Table 17, reasons for idleness for classes A and B are presented by sex, for geographic divisions.

**Age groups.**—Table 6 presents the unemployment returns in classes A and B for the United States, by sex, in 5-year age groups, from ages 10 to 14, to 70 years and over. All returns for children under the age of 10 were disregarded, as in the occupation tabulation such persons do not fall within the definition of gainful workers. These figures will become more significant when the tabulation of all gainful workers by age groups becomes available. Age groups for classes A and B are presented by sex for geographic divisions in Table 18.

**Family relationship.**—Table 7 gives the unemployment returns in classes A and B, by sex and by relationship of the person unemployed to the family group of which he (or she) is a member. These figures show the number of persons who were themselves at the head of families, the number who were related family members, and the number who were not returned as related members of a family. This last group is composed of lodgers, and of persons living alone or in "partnership families." In Tables 19 and 20 the unemployment returns in classes A and B are shown by family relationship and sex, for geographic divisions and States.

**TABLE 7.—UNEMPLOYMENT RETURNS—CLASSES A AND B, BY SEX AND BY FAMILY RELATIONSHIP, FOR THE UNITED STATES: 1930**

Not able to speak English.....	5. 3	5. 3	5. 5	5. 7	5. 3	9. 5

**Industry groups.**—In this summary bulletin, tables are presented for the United States showing the unemployment returns in classes A and B, by sex and industry groups, with the number of gainful workers in each industry group for comparison. In these tables the agricultural group is the only one subdivided by occupation. Of these agricultural occupations, that of "Farm laborers—Wage workers" is by far the most significant. The occupation group "Farm laborers—Unpaid family workers" is of no significance in relation to unemployment, as such persons would not properly be returned on the unemployment schedule, even though not at work. It was thought necessary, however, to include family workers in the total of gainful workers, as otherwise the figures would not agree with those in the population report.

In Tables 9 and 10 the returns in classes A and B are shown by sex for the United States, by broad industry groups. The full list of 55 industry groups is shown for classes A and B in Tables 21 and 22 by sex, together with the number of gainful workers by sex, in each industry group. The per cent distribution of the returns in classes A and B is shown in Table 23. Table 24 shows the returns in classes A and B by industry groups, for Negroes in the Southern States. In Tables 25 to 42, the number of gainful workers and the unemployment returns in classes A and B, with per cent of gainful workers, are presented by sex for each of the nine geographic divisions. The returns in class E (persons out of a job and not looking for work) are also presented by industry groups in Table 44.

TABLE 9.—UNEMPLOYMENT RETURNS—CLASS A, BY SEX AND BY MAIN INDUSTRY GROUPS, FOR THE UNITED STATES: 1930

Urban and rural areas.—In Table 11, the returns in classes A and B are presented by sex, for urban population groups, and for rural territory. In this table the total population and the number of gainful workers are also shown with per cent of population and per cent of gainful workers in each unemployment class.

TABLE 11.—UNEMPLOYMENT RETURNS—CLASSES A AND B, BY SEX, FOR URBAN GROUPS AND RURAL TERRITORY, FOR THE UNITED STATES: 1930

Geographic Divisions, States, and Cities.—In Table 12, the unemployment returns in classes A and B are presented by sex for States, together with the population of each area, the number of gainful workers, and the percentage of population and percentage of gainful workers in each unemployment class. In Table 13, classes C, D, E, F, and G are shown in totals for geographic divisions and States. In Table 14 the returns in classes A and B are shown for cities of 50,000 and over in a form parallel with the presentation by divisions and States in Table 12. Table 15 shows returns in classes C, D, E, F, and G in total for cities of 50,000 and over.

TABLE 12.—UNEMPLOYMENT RETURNS—CLASSES A AND B, BY SEX (AND BY COLOR FOR THE SOUTH), BY STATES: 1930

[Per cent not shown where less than 0.1]

Rejected cases.—Outside of the returns which are tabulated in this bulletin there were 162,050 other persons in the United States for whom there was some indication, either on the unemployment schedule or on the population schedule, that they were not at work the day before the enumerator called. These cases were rejected in the regular tabulation for various reasons. The principal reasons, and the number of cases rejected under each reason, are as follows:

a. Not a gainful worker, 20,474. These were cases for which no gainful occupation was returned on the population schedule.

b. Retired, 7,766. These persons were either definitely returned as retired, or were over 70 years old and had been idle for a period of several years.

c. Permanently disabled, 14,573. These were persons for whom there was some entry indicating permanent disability, or who were sick or injured and idle for a period of several years.

d. Unpaid family worker, 5,876. These were persons who had been working for members of their own families without money compensation.

e. Legal holiday or rest day, 2,034. These were persons regularly employed but erroneously returned on the unemployment schedule because a legal holiday or their usual weekly "rest day" occurred on the day before the call of the enumerator.

f. Seeking first job, 1,929. These were persons just out of school who had never been regularly employed.

g. Attending school, 3,854. These were persons who had left their regular employment in order to go to school or college.

h. Omitted entries, 100,252. This is the most numerous group of rejected cases. These were cases for which there was an answer on the population schedule indicating unemployment, but no entry whatever on the unemployment schedule.

i. Other reasons, 5,281. In this group were placed all other unemployment returns made contrary to the instructions given to the enumerator.
